

AIRLINE ROAD TO SKY HARBOR AIRPORT - PHOENIX, AZ

PROJECT DESCRIPTION

Reinforcement with FORTA-FI[®] was used in this 2" overlay with edge milling to **help delay reflective cracking and maximize the useable life of this roadway surface.** This is the second project at Sky Harbor to utilize FORTA-FI[®] after successful results were achieved on the G2 Flyover Bridge.

KEY POINTS

- Extended Pavement Life
- Reduced Rutting & Raveling
- Reduced Cracking
