

METRO SQUARE PARKING LOT - PHOENIX, AZ

PROJECT DESCRIPTION

The entire parking lot was replaced with FORTA-FI[®] reinforced asphalt. The pavement section was reduced to 2" in the parking stalls and 3" in the drive lanes. **This solution was chosen as it will lead to greater crack resistance and life extension.**

UPDATE

An inspection carried out two years after the installation indicated the presence of only two very small cracks across the entire lot. Following its impressive performance on this project, **KIMCO has chosen to use this product exclusively on all their Arizona properties.**

KEY POINTS

- Extended Pavement Life
- Reduced Rutting & Raveling
- Reduced Cracking

DETAILS
