

RESIDENTIAL STREET - LODI, OH

PROJECT DESCRIPTION

FORTA-FI was used in this 1 1/2" thick surface course overlay for a residential street in Lodi, Ohio. The fiber reinforced topping was placed over a deteriorated concrete pavement that was over 800 feet in length. **Project owner reported no reflective cracking or deterioration after the 1-year project evaluation period.**

KEY POINTS

- Extended Life
- Reduced Cracking
- Saved Time

DETAILS

Date: July 1995
