

Certification

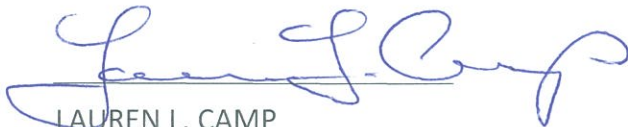

GLASS FIBER REINFORCEMENT

MATERIAL CERTIFICATION

FORTA Corporation hereby certifies that Surface-EXT™ fiber reinforcement is manufactured of alkali and acid resistant glass in compliance with ASTM C1666/C1666M-08(2015) and EN 15422. In addition, the fibers are designed and manufactured under a Quality Management System approved to ISO 9001 specifically for use in micro surfacing and slurry seal application.

SPECIFICATION AND CODE COMPLIANCE

Surface-EXT™ fiber reinforcement fibers comply with all material specifications according to ASTM C1666/C1666M-08(2015) and EN 15422. Surface-EXT™ fibers meet safety standards according to European Directive 99/45/EC, 67/548/EEC and their latest amendment. Surface-EXT™ fibers are not classified as dangerous by the Regulation 1272/2008/EC. For more information, please refer to our Safe Use Instructions Sheet.
