

CITY STREET - DARTMOUTH, MA

PROJECT DESCRIPTION

The city of Dartmouth utilized Surface-EXT AR glass fiber in a micro surfacing application for a city street in order to **reduce reflective cracking and improve long-term durability**. The fiber was easily dispersed into the mix and **flowed effortlessly** while achieving the desired workability. As always, **the demand for the quick reopening of repaved city streets is of paramount importance** and the use of Surface-EXT helped achieve this goal.

KEY POINTS

- Excellent Workability
- Improved Set Time
- Long-Term Durability

DETAILS

Date: August 2012
