

QUARRY LANE - STANLEY, NC

PROJECT DESCRIPTION

This dead-end, private road received a much needed resurfacing in this direct overlay project. This high-volume road services a quarry, asphalt plant, solid waste disposal, and concrete plant in Charlotte, North Carolina. FORTA-FI reinforcement fibers were **easy to use** and expert on-site specialists were able to keep plant impact to a minimum.

KEY POINTS

- Reduce Cracking
- Reduce Rutting
- Easy to Use
