

SR13 - MANSFIELD, OH

PROJECT DESCRIPTION

The Ohio Department of Transportation used FORTA-FI[®] to reinforce portions of the State Route-13 repaving project south of Mansfield, Ohio. **This high-traffic roadway connects to Interstate-71, with high-use entrance and exit ramps and a well-traveled business access intersection at Hanley Road.** ODOT selected FORTA-FI[®] for use in various sections of this asphalt material trial project. A traditional Superpave asphalt mix design was used for the entire project, with FORTA-FI[®] added to the fiber-reinforced portions of the roadway where specified.

KEY POINTS

- Extended Pavement Life
- Reduced Rutting & Raveling
- Reduced Cracking

DETAILS

Date: July-August 2011

Location: Mansfield, OH

Tonnage: 3,700

Fiber: FORTA-FI[®]
