

BASHLINE DRIVE - GROVE CITY, PA

PROJECT DESCRIPTION

FORTA-FI was used to reinforce asphalt in a 1-1/2" resurface of a private roadway serving 4 homes in Grove City, PA. FORTA-FI showed no mixing or placing issues and required no changes to the mix design at the asphalt plant. Using FORTA-FI in this roadway will result in a **longer pavement life** and **reduce reflective and alligator cracking**, with which the owners were having problems. By fixing these issues, the owners will **reduce maintenance costs** in the future, **saving them time and money**.

KEY POINTS

- Reduced Maintenance Costs
- Reduced Cracking
- Extend Pavement Life

DETAILS

Date: September 2010

Location: Grove City, PA

Tonnage: 125

Fiber: FORTA-FI[®]
